

The RY Roof system is a tower-based aluminum structure with a pitched roof, a design that inherently offers optimum strength. The RY-967/3-Spigot Series offers flexible possibilities for creating stage dimensions up to 9x6x7m, this size is popular used in all kinds of events and shows.

Reichy has sold over 1000 pieces of this system all over the world, as a professional stage trussing manufacturer.

Technical specifications available on request.

Advantages:

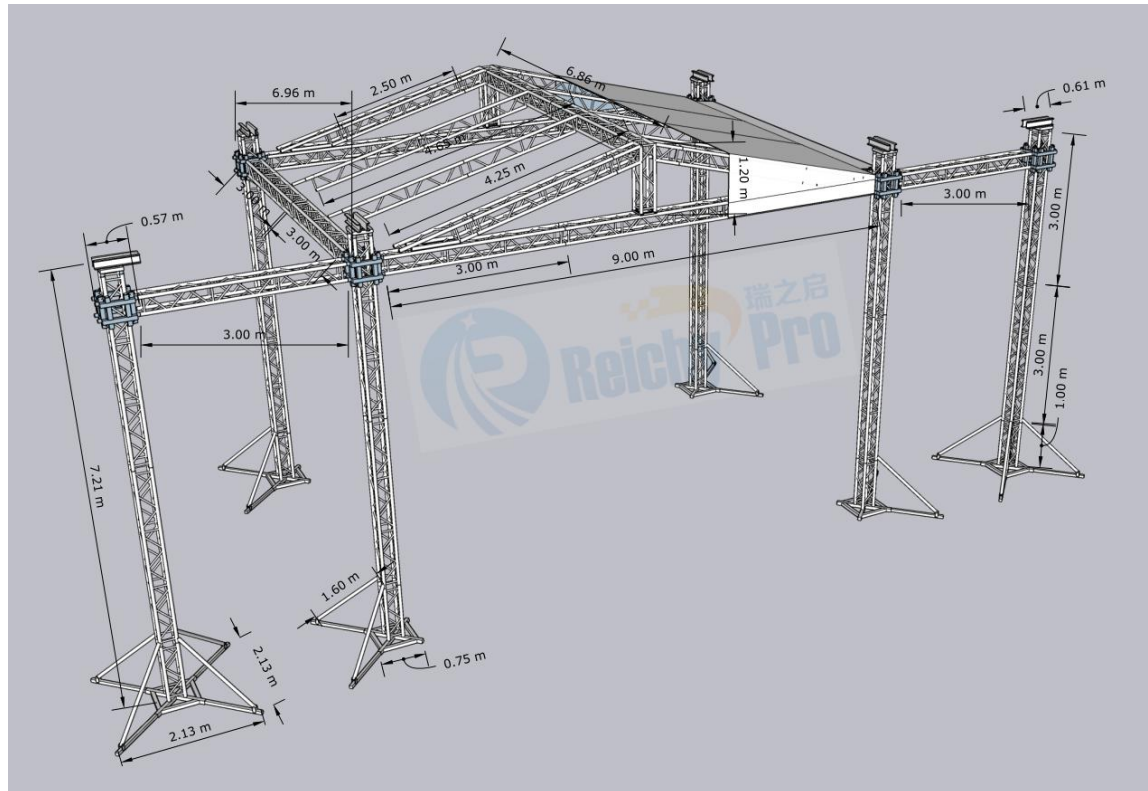

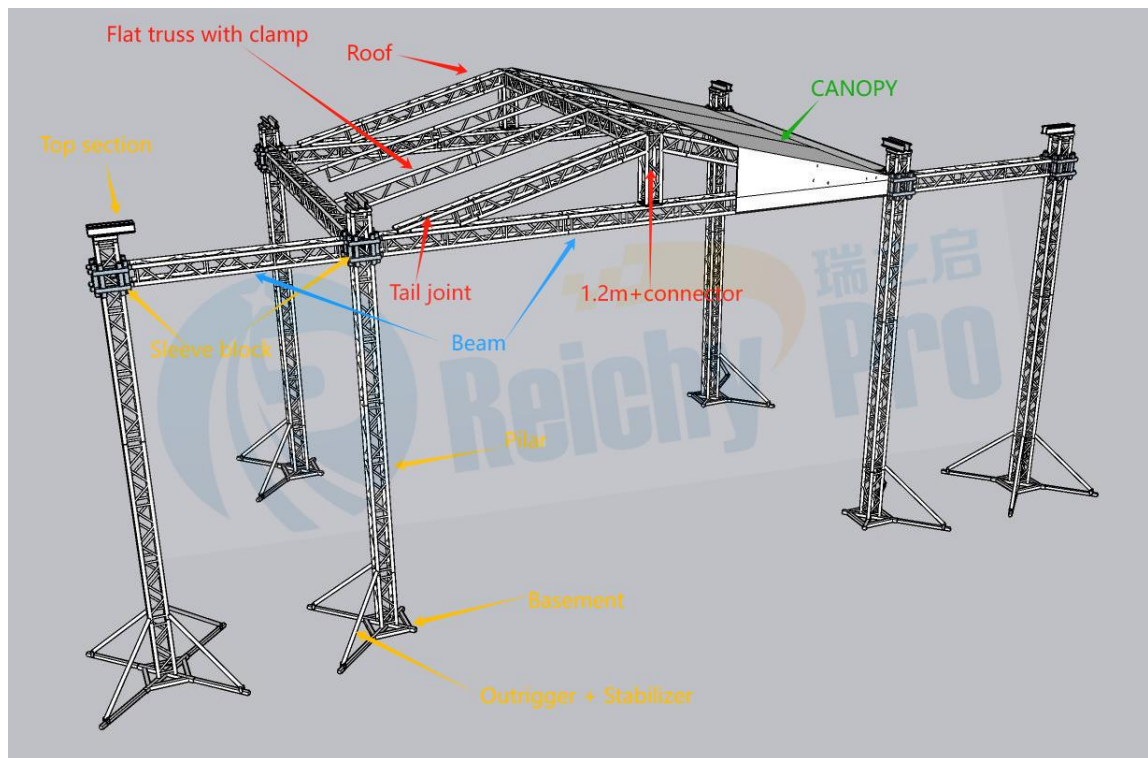

- 1, made by strong aluminum, high thickness and good welding tech.
- 2, flexible possibilities for stage dimensions
- 3, easy to install
- 4, extra options available

Reichy truss - pre-configured roof trussing system -stage trussing kits with canopy
