A5F.4801

Fluorescent Attachment for Zoom Stereo Microscope

A5F.4801 Details

A5F.4801 is a stereo microscope digital display fluorescent module, using ultra-long life LED as a light source. It easily converts an ordinary stereo microscope with infinity optics into a Energy-saving, high-efficiency, easy-to-operate, and long-life LED stereo fluorescence microscope, adding The fluorescence observation function does not affect the wide-field observation. A5F.4801 can be matched with its own brand stereo microscopes, and can also be adapted to Olympus, Zeiss and Other famous brand stereo microscopes.

A5F.4801 Operation

Open package, take out 12V 2A power adapter and the fluorescence illuminator

Connect the power adapter to the power jack the fluorescent module.

Press power button, display screen will show 'OFF', it means the illuminator has been power on and the fluorescence lighting is OFF.

Press brightness control knob, the display screen will show 'B-----%' means fluorescence lighting is on and light intensity is 0 (Zero)
Press the knob during installation will suspend the fluorescence lighting

Filter cube wheel is used to move different filter sets and matching with the LED lamp. There are B/G/UV/O four channels, each channel should be matched with lever (O presents bright field for microscope original bright field lighting, set fluorescence lighting to no light, any lever status is workable)

Draw and push the lever to move different LED lamp lighting. There is B/G/U, the display screen will show matched lamp color automatically when draw the lever

A5F.4801 Specification
