

Hangzhou Wehere Medical Technology co. LTD

Company Introduction

Hangzhou Wehere Medical Technology co. LTD. Is a professional manufacturer and manufacturer of modern medical equipment, engaged in the production and development of various kinds of pressure anti - hose socks, sports health and other products. Company since it was founded in 2017, has been unremitting in new technology, new materials, new product research and development and application, and quickly emerge from the same industry of many enterprises, become a dazzling star in the industry.

Company introduced the world's leading production equipment, such as Italy, Switzerland has been constant pursuit of product research and development, design, process and structure of the innovation and improvement of its products are mainly provided to Chinese hospitals, pharmacies and other medical institutions, to meet the needs of all kinds of patients with varicose veins are, has been widely used in auxiliary treatment of varicose veins of lower limb and lower limb vein thrombosis syndrome.

- The company always adheres to the principle of product quality first, and wins the market with the quality principle of quality first and service first.

Equipment

Italy and Germany. The Ionati knitting machine

Used for machine for the production of class 1,2,3 compression medical socks and medical goods

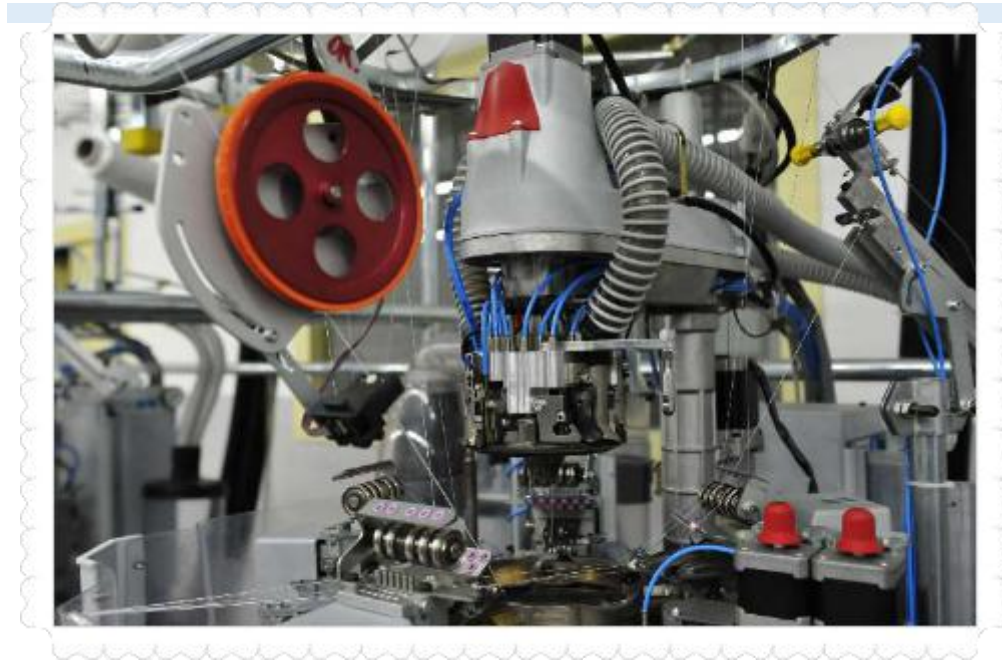

All images in this brochure are indicative and not binding.

SINGLE CYLINDER

LB40ME - LB45ME - LB50ME - LB55ME - LB60ME

Electropneumatic single cylinder 4 feeds machine for the production of class 1,2,3 compression medical socks and medical goods, with reciprocated heel and toe on 1 feed with 2 rising needle pickers and 2 droppers, or pouch type heel and toe. 2 electronic selection units on each feed (one in tucking position and one in clearing position). Motorized stitch cams for enlargements in any area of the garments or on course. Single or double dial jacks. 2 or 4 feeds pattern. reciprocated heel and toe in different sizes and in different positions. Full-electronic programming of the knitting cycle. machine memory for the storing of different items in 8 sizes each. Electronic device to maintain the size at any temperature of the machine.

1. Germany and Italy hosiery machine

Production line

2. Swiss import tester

3. Own package yarn workshop

Product introduction

■ Medical varices compression stockings is authenticated by the state administration of drug safety authority of 2 kinds of medical equipment, adopt international advanced dual pressure mode to put pressure on the legs, in accordance with internationally recognized pressure gradient design, have the effect of in vitro "muscle pump", effectively relieve stress lower limb venous valve, promote the lower limb venous blood backflow, implementation of varicose veins, phlebitis, treatment of deep vein thrombosis have relaxed, significant repair, the effect of comprehensive prevention.

Percentage of Graduated Compression

Girth/size	s	m	l	xl
Ankle	18-22	23-25	26-28	29-32
Calf	30-39	33-42	36-45	39-48
crus	29-38	32-41	35-44	38-47
thigh	49-63	53-66	57-70	62-75

Products

Medical varicose compression socks

According to the model and specification, it can be divided into three types: Knee high type, Thigh High type and Pantyhose type.

According to the pressure level, it can be divided into three levels

According to the color can be divided into: skin, black

According to the size can be divided into: S, M, L, XL

Imported equipment, octagonal diamond knitting, Long lasting and stable performance.

High density step by step decompression weaving method to promote blood flow back to the heart.

Ergonomic design, fit leg shape, Comfortable and breathable.

High quality spandex is selected for long-lasting elasticity and excellent recovery.

The coated yarn adopts nylon double package process, which is strong, wear-resistant and anti pilling.

Imported silicone anti-skid belt is used to prevent allergy.

Size: S, M, L, XL

Color: Skin, Black

Class I: 15-21mmhg Class II: 23-32mmhg Class III: 34-46mmhg

Thigh High Open Toe

Dew toe

Knee High Open Toe

Class I

- People who stand or sit in for a long time, such as nurses, teachers, flight attendants, salesmen, hairdressers, etc
- Pregnant women, obese people, and people with "economy class syndrome" caused by frequent business trips and flights
