LONG TERM HEMODIALYSIS CATHETER KIT

Medical Uses

The catheter kits are intended for long-term implantation for dialysis and apheresis therapy. The catheter comes in either straight for easy use.

Material

Radiopaque silicone provides excellent visibility and biocompatibility.

Tip Design

The tunneled catheter's staggered tip design allows for less than 5% recirculation.

Circle C Cross Section Design

The Circle C design optimizes blood flow and minimizes venous back pressure.

Anchoring

The silicone catheter has a low-profile polyester cuff that allows for secure tunneled anchoring and rotating suture wings for secure external anchoring.
