

DRAMA 300T FRESNEL

Drama 300T Fresnel is an all-weather lighting fixture designed specifically for professional performances, film and television production, and outdoor lighting projects. It breaks through the traditional single color temperature limitation and can be freely and smoothly adjusted within the range of 2400K to 7600K. Ultra wide electronic zoom system from 8 ° to 60 °. IP65 protection level ensures stable operation even in harsh environments such as rainy days

Key features:

- 300W warm white+300W cool white LED
- Ultra wide electric zoom range of 8 ° -60 °
- IP65, Fearless of wind, rain, sand and dust, suitable for both indoor and outdoor projects
- 2400K-7600K color temperature adjustable
- Smooth dimming, no flicker
- Support remote management of address codes for more efficient debugging and maintenance
- No fan, ultra quiet

Application:

- High definition studio
- Theater, church
- Film shooting
- Museum
- Exhibition lighting
