

Strobe 500 IP

Waterproof dyeing strobe light

The Strobe 500 IP is a high-performance, multifunctional stage lighting device suitable for various performances, stage scenery, and entertainment venues. It adopts an advanced combination of 768 RGB light beads and 96 high-power white light beads, providing rich color expression and strong flashing effect. The device supports multiple control modes, including DMX512, self-propelled, master-slave, and voice control, and has RDM function for flexible and convenient operation.

Key features:

- 500W total power, 768 RGB light beads (0.5W/bead) and 96 white light beads (3W/bead), with full color and outstanding brightness.
- Support DMX512, self-propelled, master-slave, voice, and RDM functions to meet diverse scene requirements.
- All metal cast aluminum body, IP68 protection level, dustproof and waterproof, suitable for extreme environments of -30℃ ~60℃ .
- Long term immersion in water up to one meter deep

Application:

- Stage
- Concert
- Theater

Technical Data

Power supply:	AC100 - 240V, 50/60Hz	Effect:	Staining+Sparkling
Power consumption:	500W	Control channels:	6/133/18/78/156/158
Light source:	768*0.5W RGB, 96*3W W	Control mode:	RDM, Self-propelled, Voice, DMX, Master slave,
Colors:	RGBW	Housing:	Colour black
Power connection:	Power in & out	Environment:	IP68
Signal connection:	3 pin XLR in & out
