The CO2 gun doesn't need DMX 512 controller and power like other CO2 machines, only need 1 gun + hose + gas tank. One CO2 tank is needed per CO2 gun.

If need the backpack is also ok, Detailed steps for assembling gas cylinder + backpack as follow:

As shown in the figure above, install the gas cylinder on the strap. Fasten the iron strip under the cylinder.

- ① Put the gas cylinder into the harness.
- ② The bottom of the gas cylinder is tightly pressed on the strap clip, as shown in the figure.
- ③ The iron bar is bent and inserted and tightened with a cross screwdriver.
- ④ Tighten the cloth and fix the gas cylinder.
- ⑤ Open the battery cover of the gas column gun and put in 8pcs No. 5 batteries.

Note:

- a. the end of hose can be connected to 5kg or 25kgs gas cylinder
- b. The end of hose can be connected to the gun connector
