Motion detector JS20

code: JS20

P.I.R. motion detector is for interior protection. It detects object movement having a human body temperature. The JS-20 distinguishes itself with excellent RF immunity. The signal from the sensor is electronically analyzed. This ensures that the detector provides excellent sensitivity and false alarms are basically eliminated. The detection analysis rate can be adjusted to increase its immunity if the JS20 is installed in a problem location. It can be mounted on a flat wall or in a corner. Connectable to binary input, powered from 12Vdc, e.g. acdc adapter A1510.

For application with M13xx Multiloggers please see pdf Manual for connection of detectors in the Download folder.
