MIDCON WIRING SOLUTIONS

RF Connectors®

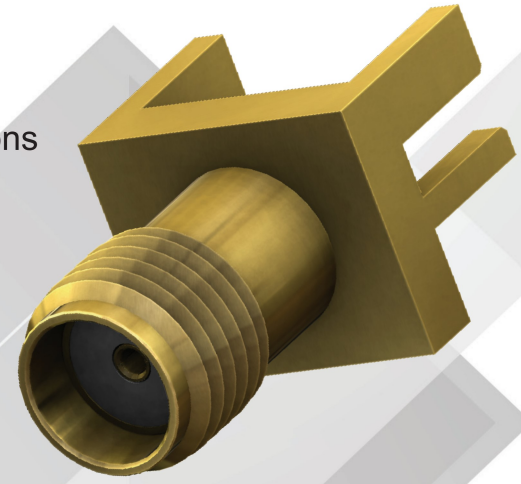

Introducton: The Midcon RF product line provides a variaton of RF Coaxial Connectors. These high performance, low-cost coaxial threaded, push on, board mount and cabled connectors provide end users with the solutions needed to support frequencies up to 110 GHz. These products support various applications ranging inside the box applications, to board mount connectors and bench top test applications. Connector types include SMP, SMPM, SMA, SMB, TNC, BNC, Type N, MCX, MMCX, 3.5mm, 2.92mm, 2.4mm, 1.85mm, 1.35mm & 1.0mm. Multiple mounting options include, vertical, edge mount in both solder, solderless and SMT options.

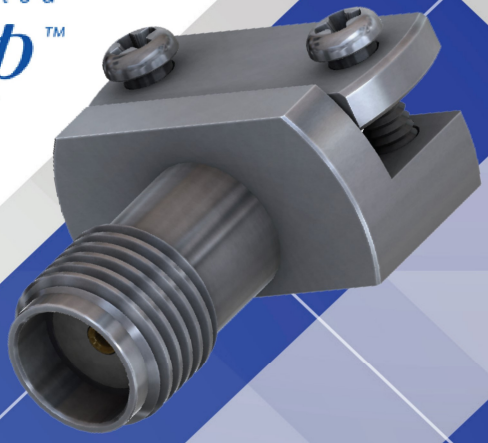

Benefits:

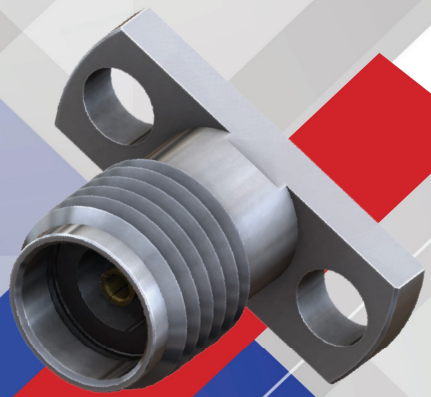

- 5G Applications
- Low Cost
- Text & Measurement Applications
- Muliple Mounting Optons-Vertical, Edge Mount, Solder & Field Replaceable
- Commercial Applications
- Through Hole & SMT
- Mil-Def Applications
- DC-110 GHz
- Inside The Box Applications
- Bench Top Testing
