

RFM Integrated Device, Inc.

PRODUCT SPECIFICATION

Part Number: XTC4003

TCXO, 30.72 MHz, +/- 0.5 ppm max @
25°C +/- 3°C

SMD 5.0x3.2 30.72MHz VCTCXO

Features:

- Miniature SMD Package
- Good Frequency Stability
- Good Phase Noise Response
- Moisture Sensitivity Level: 1

Description and Applications:

Surface mount 5.0mmx3.2mm VCTCXO for wireless communication system.

Electrical Specifications:

XTC4003	Specifications
Nominal Frequency, Fo	30.720000 MHz
Storage Temperature Range	-40°C to +85°C
Operating Temperature Range	-20°C to +70°C
Power Supply Voltage, Vcc	3.3 V +/- 10%
Power Supply Current, Icc	6.0 mA max
Control Voltage, Vcon	1.5 +/- 1.0 V
Frequency Tolerance (Vcon=1.5V) as received	+/- 0.5 ppm max @ 25°C +/- 3°C
Frequency Stability a. Vs. Temperature (-20~70°C) b. Vs. Load varied 15pF +/-10% c. Vs. Supply Voltage varied Vcc+/-5%	+/- 0.5 ppm reference to 25°C +/- 0.3 ppm +/- 0.4 ppm
Vcon Frequency Control Range (1.5+/-1.0 V)	+/-5 ppm min
Vcon Input Impedance	100 KOhm min
Output Waveform	CMOS
Load	15pF
"0" Level "1" Level	10% of Vcc max 90% of Vcc min
Rise Time (10% -> 90% of final RF level in Vp-p) Fall Time (90% -> 10% of final RF level in Vp-p)	6 nsec max. 6 nsec max.
Duty Cycle	45% ~ 55%
Aging	+/-1.0 ppm/year @ 25°C

Mechanical Dimensions (mm):

Marking:

Line 1: Frequency (30.720)

Line 2: Product code + Date Code + Traceability Code (XX)

Packing :

1. Reel Dimension

Reel Count:

7" = 1000

Unit:mm

2. Tape Dimension

Unit: mm

Reflow Profile:

Notes of the Usage:

1. Touch the solder iron at 260 $\pm$ 5 deg C onto the leads for 10 $\pm$ 2 sec max or touch the solder at 350 $\pm$ 5 deg C onto the leads for 3 $\pm$ 0.5 sec.
2. In the customer's reflow process, if it will remain some mechanical stress at the soldering terminals, also make some cracks on the soldering termination. Some cracks will cause open or short circuit and cause of thermal increasing or smoking. Don't make any excess mechanical stress to soldering points.
3. In case of giving a heavy shock to the products, it may make an open or short circuit and cause of thermal increasing and smoking. To avoid heavy shock impact applying to products is strictly required.
4. Ultrasonic cleaning should be avoided to prevent damage to the crystal.
5. Do Not Use Ultrasonic-Wave Soldering or Wave Solder with Package Immersed in Solder.

Notes of the Storage:

1. To keep products under the condition at the room temperature (-5~35 deg C) with normal humidity (45~75%). Absorption of moisture and dewdrop may make inferiority of characteristics and a short circuit.
2. Oxidization of terminals shall make the solderability more inferior. Dusts and corrosive gas will make a cause of the open or short circuit. Keep it in the clean place where is not in dusty and no corrosive gas.
3. Use the anti-static material to the storage package.
4. Don't put any excess weight to the TCXO in the storage process.

5. Don't move the product from the cold place to the hot place in the short time, otherwise it may make some dew-drop, then a short circuit may happen in case.
6. Storage periods should be maximum 6 months under condition of above item 1 after delivery from the factory.
7. Once open the bag, there is possibility of electrical characteristics deterioration due to absorption of moisture. So, please use parts within 7 days after opening the bag.

If you have to keep parts without using after opening the bag, please put the drying agent in the bag, fold the bag and keep it in the place where temperature and humidity are controlled (nitrogen atmosphere box etc.)
